

Week 24 Day 4 - ngDialog & Toaster

Review

gulp & grunt

ngDialog

Plain vs. template

<https://github.com/likeastore/ngDialog#plain-boolean>

```
ngDialog.open({  
  template: '<p>my template</p>',  
  plain: true  
});
```

Open ngDialog in a controller

<https://github.com/likeastore/ngDialog#controller-string--array--object>

```
ngDialog.open({  
  template: 'externalTemplate.html',  
  controller: 'SomeController'  
});
```

Open ngDialog with a directive

<https://github.com/likeastore/ngDialog#directive>

```
<button type="button"  
  ng-dialog="templateId.html"  
  ng-dialog-class="ngdialog-theme-flat"  
  ng-dialog-controller="ModalCtrl"  
  ng-dialog-close-previous>  
  Open modal text  
</button>
```

Set defaults for all dialogs in your app

<https://github.com/likeastore/ngDialog#setdefaultsoptions>

```
var app = angular.module('myApp', ['ngDialog']);  
app.config(['ngDialogProvider', function (ngDialogProvider) {  
  ngDialogProvider.setDefaults({  
    className: 'ngdialog-theme-default',  
    plain: true,  
    showClose: true,  
    closeByDocument: true,  
    closeByEscape: true  
  });  
}]);
```

Toaster

<https://foxandxss.github.io/angular-toastr/>

View Angular Toastr demo

Exercise

Add a login dialog box and toaster messages to ToDo app or Star Wars uiGrid app.
